Senior UI/UX Designer | Enterprise B2B Products | Complex Workflows & Design Systems

SUMMARY

Senior UI/UX Designer with 5+ years of focused UX/product design experience designing scalable SaaS products, enterprise portals, admin dashboards, and complex workflow-driven systems. Experienced in converting business requirements into user flows, wireframes, high-fidelity interfaces, prototypes, design systems, and developer-ready handoffs. Skilled in designing B2B platforms across vehicle operations, dealer workflows, master data management, investment workflows, event operations, HR systems, property management, and visitor management. Strong understanding of usability, interaction design, agile collaboration, design rationale, stakeholder feedback, responsive UI, and design-to-development collaboration.

CORE SKILLS

Product and UX:	Enterprise UX	B2B SaaS	Complex Workflow Design	Data-Heavy Interfaces	User Flows
	Information Architecture		Interaction Design	Design Systems	Responsive Web Design
Delivery	Prototyping	Developer Handoff	Implementation Review	Design QA	UX Documentation
	AI-Assisted Design Workflows				

TOOLS & TECHNICAL FAMILIARITY

Tools:	Figma	FigJam	Jira	Slack	Notion	Codex	Adobe XD
Technical:	HTML	CSS	Bootstrap	Responsive Layouts			
	React Fundamentals	Next.js Fundamentals	Angular/Ionic Collaboration			JavaScript Fundamentals	JSON-Driven UI Patterns

PROFESSIONAL EXPERIENCE & KEY PROJECTS

Senior UI/UX Designer Crecientech Infosystem	Oct 2020 – Present
- Designed SaaS products, enterprise portals, dashboards, and workflow-heavy systems across multiple business domains. - Converted business requirements into user flows, wireframes, interface structures, prototypes, responsive screens, and developer-ready specifications. - Worked with stakeholders and clients to clarify workflows involving multiple roles, permissions, statuses, validations, and operational rules. - Designed reusable patterns for tables, forms, filters, steppers, status indicators, drawers, dashboards, and feedback states. - Collaborated closely with developers during implementation, reviewed UI builds, documented inconsistencies, and supported design QA before deployment. - Used frontend knowledge to make practical design decisions while maintaining existing components, CSS patterns, and approved functionality.	

KEY PROJECTS

Harbinger Motors | Enterprise Vehicle Operations Platform

Dealer Portal and HBR Portal

- Designed workflows across two connected enterprise portals: the Dealer Portal and HBR Portal.
- Worked on Vehicle Tracking, Build Your Own, Master Data, Delivery, Service Center, Warranty Claims, and Vehicle PDI modules.
- Simplified data-heavy workflows involving administrators, dealer teams, employees, vehicles, VINs, product configurations, transfers, inspections, warranties, and delivery statuses.
- Designed tables, filters, multi-step forms, drawers, status systems, role-specific actions, validation states, and responsive workflow screens
- Helped introduce JSON-driven forms so labels, field types, validations, required states, options, and ordering could be managed through configuration when requirements changed.
- Worked closely with developers to reuse existing components and styling, review implementation, and resolve UI inconsistencies without disturbing approved functionality.

Aadivara | Inclusive Employment and Event Operations Platform

- Designed connected experiences for candidates with disabilities, administrators, employers, partners, and volunteers.
- Created workflows for registration, QR and manual check-in, company and room mapping, job allocation, interview status, print slips, and offline volunteer operations.
- Defined offline sync states, including syncing, completion, and error handling, for volunteers working in locations with unreliable connectivity.
- Considered accessibility through clear hierarchy, readable content, simple actions, and reduced interaction complexity.

InventFunds | Investment, NDA, and Founder/Funder Workflow Platform

- Designed dashboard experiences for founder and funder workflows.
- Improved NDA visibility through role-specific cards, current and past NDA sections, global NDA templates, and clear empty, loading, and error states.
- Collaborated on Angular/Ionic implementation by reviewing UI structure, styling, and component behaviour.

Property Care - Property and Facility Management Platform

- Designed property workflows for property details, service requests, user information, dashboards, forms, filters, and status-based operations

HCM Café - HR and Employee Management Platform

- Designed HR-focused interfaces for employee management, internal workflows, dashboards, forms, and administrative modules.

Visitor Management System - Visitor Entry and Tracking Platform

- Designed visitor registration, check-in, check-out, approval, tracking, host details, visit purpose, and security desk workflows.

EDUCATION

Bachelor of Computer Applications - BCA

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Interaction Design Foundation:** Visual Design: The Ultimate Guide, Design for Thought and Emotion, User Research - Methods and Best Practices, User Experience: The Beginner's Guide, Design Thinking: The Ultimate Guide, UI Design Patterns for Successful Software, Design Thinking: The Beginner's Guide
- **Other:** Diploma in iSMAC - Java & Android, IIHT - 2016
- Languages: English, Kannada
